

Many email clients allow HTML signatures. If you would like to embed the signature image like mine below, use the HTML code (in italic) below. You can change the link the picture points to be replacing the RED text. Unfortunately, GMAIL does not allow image signatures. Most other emails do.

SMALL

```
<A href="http://www.bhopal.net/"> <IMG  
src="http://www.geocities.com/prakaash_77/misc/HungerStrikeAni  
mated_small.gif"> </A>
```

LARGE

```
<A href="http://www.bhopal.net/"> <IMG  
src="http://www.geocities.com/prakaash_77/misc/HungerStrikeAni  
mated_Large.gif"> </A>
```
